### Changing Global Perspectives on Horseshoe Crab Biology, Conservation and Management

- ▶ Provides up-to-date research on horseshoe crab evolution, genetics, physiology, ecology, conservation and laboratory culture
- ▶ Offers scientists students, conservationists and resource managers an integrated approach to the ecology and conservation of American and Asian populations of horseshoe crabs
- ▶ Includes balanced contributions on the assessment of conservation threats, status and needs on conservation and management
- ▶ Maximizes reader insight into a balanced perspective, including equal emphasis on primary research and conservation topics for both American and Asian species

This book reports significant progress of scientific research on horseshoe crabs, including aspects of evolution, genetics, ecology, population dynamics, general biology and physiology, within the recent 10 years. It also highlights the emerging issues related to world-wide conservation threats, status and needs. The contributions in this book represent part of an ongoing global effort to increase data and concept sharing to support basic research and advance conservation for horseshoe crabs.
